Loading the Camel.

"In India," said a gentleman who recently returned to this country after living many years in the East, "the camel is used fully as much as the elephant as a beast of burden. He is not so powerful as the elephant, but he can carry an enormous load on his back. He does not W. B. WADDEY, on enormous load on his back. He does not do so willingly, however, and is by no means the patient, decile servant that the elephant soon becomes under proper training. When I first went to ludia as a young man I was connected with a mercantile firm in the northeast provinces, and while there I had abundant op-

portunity of studying the camel, for means of carriage in that part of the country n those days was confined to elephants, camels, bullcoks and men. Horses were not used as beasts of burden. Every day camels and elephants were driven up to our office door and loaded with wine and beer cases for far away customers. The elephant would go clumsily down on his great knees and allow himself to be loaded until he was crushed to the earth beneath the weight of his load had his driver seen fit to pile on the bexes. But the camela receiving their burdens was a spectacl; never to be forgotten. They never varied in their behavior, and every one that I ever saw loaded-and I have seen thousands-acted in precisely the same manner. "The came!, when he is not eating or drink-ing or being loaded, is invariably chewing the cud. His long, crocked jaw is in perpetual motion, and when he is told to lie down to re-

ceive his burden he does so without varying this incessant masticatory process. He awkwardly bends his fore knees, drags his hind leg under him, and comes to the ground with a curious kind of flop. All this time his long, melancholy face shows not the slightest indication that he knows what he is lying down for; and this unmistakable hypocrisy, I think, stamps the camel as an animal of a very high order of intellect. But in a few seconds the expression on the camel's face undergoes a striking alteration. As he sees the driver approaching him with a bex on his shoulder he seems at last to understand the indignity and torture to which he is about to be submitted, and the astonishment, virtuous iodignation and dismay on the ill used animal's countenance ought certainly to make some impression on the stony heart of the driver. They never have the slightest effect. The man binds the first box on the wretched animal's back, and goes away to get another. Then the camel, wisely abandoning his efforts to move man to compassion points his hairy

"Never in circus, pantomime or show have I seen anything half so ludicrous as the camel's appearance at that moment. His upper lip is curled back from his teeth, his noder lip doubles up and drops down as though he had no further use for it, his great mouth opens so wide that one can see about half a yard down his throat, and one of the cavern thus revealed comes a series of the most astonishing hows that ever startled the air-howls of such abject misery that it is difficult to avoid the conclusion that the camei's heart is breaking; and the impression is strengthened by the tears that flow copiously down the wailing animal's clougated cheeks and drip from the end of his nose. In the utterance of each note of woe the camel seems to be exirting the utmost power of his lungs, but he is all the time bolding a large force in reserve, and as the driver adds box after box to the pile on his back, a howl more resonant and heart-rending than the last testifies to each addition to the oreature's misery; and never. (x sept when he is absolutely engaged in trumpeting his agonies into space, are the great watery eyes of the camel removed from the person of his persecutor: they follow wherever he goes, and express, through their tears, contempt, indignation, astonishment and dismay. I think it must have been this extraordinary habit on the part of the ship of the desert' that gave rise to the well known expression: 'Lt's the last straw that breaks the camel's back.' But the stern Eastern driver has no fear of any such catastrophe, and piles up the load uatil it reaches almost the proportions of an elephant's burlen. Theo, the cases being bound fast with ropes, the camel is told to rise, and the soimal, feeling that he has conscientiously done his whole duty by entering his protest at every stage of the work, contentedly accepts the unavoidable result, stops his teers, suppress s his cries, gets up on his feet, and resuming his occupation of

CHINESE CRIMINALS -In the treatment of their State criminals the Chinese move with characteristic tardiness, and a doomed man has many months of life before him. Routine fixes the month of December as the most convenient season for public executions. The prisons in all the different provinces are all well stored with criminals under sentence of death, but when the end of the year approaches the Minister of Justice revises the list of these envicts, striking out any names that he desires to spare. The paper is then submitted to the Emperor, who in turn revises the list and exercises the imperial clemency. When December comes round the fatal list goes the circuit of all the Provinces.— The governor assembles his prisoners and holds a solemn review at the place of execution. The time has now come for formality and action. The paper is brought in duly sealed. The seal is broken and the listread out. Those whose names re crossed out learn their good luck for the first time; the others, without needless ceremony or delay are then and there executed. Ruropean the lengthened suspense would be in-torable, but the Uninese are phlegmatic, and as the majority of the convicts get pardoned. they are as hopeful to the end as New York murder-

manufacturers and dealers in stoves and tinware, have REMOVED THEIR STOVE AND WORK SHOPS TO THE SOUTHWEST CORNER KING AND WASHINGTON STREETS, (in the McBarney Building,) where they will be pleased to see all their old customers and the public generally.
